CAREER HIGHLIGHTS

TECHNOLOGY

NETLOGIX, Auckland NZ (Oct 2022 - Present)

Interim Team Lead - Designed and scoped cycle feature work (Shape Up methodology) and allocated engineering resources. Supported the wider engineering department with domain knowledge and product issues and liaised with external clients on integrations.

Backend Engineer - While in the API integrations team, I've designed, built and owned a number of micro-services within the eventing platform on AWS using Typescript. These services allow two-way integration with shippers and carriers to manage orders.

SMARTPAY, Auckland NZ (Sep 2021 - Oct 2022)

Frontend Developer - Part of an agile engineering team responsible for merchant EFTPOS transactions. I was involved in the design, build and maintenance of the flagship frontend product in VueJS. Allowing internal and external users to view transactions, manage payments and generate reports as part of the system that processes credit and debit card transactions. I also gained leadership experience by supporting the onboarding process and mentoring new engineers.
